If you are new to EventMobi, you may be prompted to create your profile upon signing in, as seen in the above screenshot. You can do so right away or click CONTINUE and do so later.

If you already have an EventMobi account, you can access your profile from the icon in the upper lefthand corner of the screen next to the notifications icon. From the dropdown menu, select EDIT PROFILE, as shown in the following screenshot.

In the following screenshot, you will see this is where you can add a photo, a bio, and your social media links! Note that the email address you registered with is not publicly viewable. Be sure to click SAVE when you're finished.

Note that under PREFERENCES, you can turn off the messaging feature if you do not want other attendees to have the ability to send you a private message.

You can also control the notifications you receive and change your time zone. Please note that the EventMobi app automatically adjusts your time zone based on your location, so for most attendees, setting it yourself should not be necessary.

If you take any notes during sessions or save any documents, you will also find them in the dropdown menu.
